What to put for our poster

- Name, logo, names
- Tagline?
- The problem we are addressing, maybe add an interview quote about the issue
    - Photo about a student doing grocery shopping
- Who we designed for
    - Persona with methods (the semi structured interviews to observations to user testing.)
    - Showing 3-4 key insights (as cards maybe)
- Design opportunity and show the double diamond process or a 3C model maybe
- Our concept
    - Large screenshots of the core features with captions
- A comic style panel showing a scenario
- Design process
    - A timeline of research → requirements _> showing old prototypes/sketches → interviews → physcial prototypes → how we refined them
- Findings of our evaluation
    - Who we tested, how and show main findings with quotes or maybe a small chart?

Optional materials we can show

- A looping video on how it works
- A small grocery store shelf with tags on them to visually show it in a more meaningful way

Design from Figma
