DECO3500 - Social & Mobile Computing

Team Charter

Semester 2, 2026 - University of Queensland

1. Team Details

Project Title

We are interested in understanding how **social media influences** the **food choices of younger UQ students when grocery shopping in person around the St Lucia area**, and how social and/or contextual computing could be used to support or influence these choices.

Team Name

NutriCart

GitHub Repository URL

https://github.com/deco3500-team

Team Lead

Aman Kushwaha

Communications Lead

Kenan Chu

2. Team Members

Member	Program	Email	Personal Aims/Goals
Aman Kushwaha	Master of Computer Science Management	s4878139@uq.edu.au	I want to develop my skills in user research and contextual design areas I haven't led before and learn how to connect academic theory to real design decisions in a team-based social computing project
James Olbes	Dual Ba Engineering + Ba Design	j.olbes@student.uq.edu.au	I want to get a better understanding of how social computing can be incorporated in modern society and how it can help me as an engineer to understand more of the design aspects of projects.
Anujitha Fernando	Master of Computer Science (Management)	s4864684@uq.edu.au	I want to strengthen my skills in user-centered design and social computing by contributing effectively to the team, understanding users' needs, and turning research insights into practical design solutions.
Kenan Chu	Bachelor of Science	s4641359@uq.edu.au	My goal is to create a portfolio piece to showcase to potential employers of what I can do

Duty Allocation

Duty Area	Description	Primary Lead
Design & Prototyping Lead	Wireframes, mockups, interactive prototype	James Olbes
Documentation & Theory Lead	GitHub WIKI, literature review, ethics, process overview	Kenan Chu
Project Management Lead	GitHub Projects task tracking, meeting notes, timeline	Aman Kushwaha
Technical / Dev Lead	Code implementation, deployment, infrastructure	Anujitha Fernando

3. Communication Plan

Main Communication Channel

WhatsApp (group chat)

Backup Communication Channel

Microsoft Teams (UQ) - also serves as document sharing via OneDrive

Expected Response Times

- Non-urgent messages: respond within 24 hours
- Urgent messages: respond within a reasonable time maybe 4 hours
- If unavailable for meetings or deadlines: notify team at least 24 hours in advance
- All members expected to check the main channel at least once daily

Meeting Schedule and Format

- Weekly team meeting: Monday 9:30-10:15am on Microsoft Teams
- In-Studio meetings: Tuesday 11am-2pm and Thursday 2pm-4pm (aligned with studios)
- Additional meetings: called as needed with minimum 24-hour notice
- Format: In-person during studios; online via Teams for out-of-class meetings
- Each meeting: brief agenda shared beforehand, notes taken and posted to GitHub WIKI

Decision-Making Process

- Decisions made by consensus where possible
- If consensus cannot be reached: structured discussion, then majority vote
- All decisions logged in meeting notes on GitHub WIKI with date and rationale
- Major decisions (domain pivots, scope changes) require all members present

How We Will Use GitHub to Manage Work

- GitHub Projects: Kanban board for tracking all tasks, issues, and progress
- Issues: Each task created as an issue, assigned to a member, with due date and labels

- Branches: Feature branches for development; pull requests for review before merging
- WIKI: Meeting notes, stand-up records, design process overview, ethical considerations
- README.md: Project overview with links to prototype, documentation, and deploy instructions

4. Conflict Resolution Plan

What Conflict Looks Like for Our Team

We define conflict as any of the following behaviors that, if left unaddressed, would negatively impact our ability to deliver quality work:

- Non-responsiveness: not responding to messages for more than 24 hours without prior notice
- Consistently weak output: delivering work that is significantly below the expected standard
- Late delivery: missing internal deadlines without communicating in advance
- Missed meetings: not attending meetings without prior notice or valid reason
- Uneven contribution: one or more members consistently contributing less than their share
- Disrespectful communication: dismissive, hostile, or unprofessional behaviour toward teammates

Escalation Process

Step 1 - Private conversation: The affected member raises the issue directly with the person involved, aiming to resolve it constructively.

Step 2 - Team meeting: If unresolved, the issue is raised at the next team meeting. The team discusses and agrees on a resolution with a follow-up date.

Step 3 - Documentation: If the issue persists, the team documents the conflict with dates, attempts to resolve, and agreed actions.

Step 4 - Escalation to staff: As a last resort only, when multiple internal attempts have failed and are documented. Contact deco3500@eecs.uq.edu.au.

Risk Matrix

Likelihood: 1=rare, 5=almost certain. Severity: 1=minor, 5=critical.

Risk	Likelihood (1-5)	Severity (1-5)	Preventive Actions
Non-responsiveness (>24hrs without notice)	4	3	Proactive check-ins; escalate if pattern continues
Consistently weak or incomplete output	2	4	Raise privately first, then team meeting; redistribute if needed
Late delivery without prior notice	3	4	Set internal deadlines 2 days before actual due dates
Missed meetings without communication	2	5	Notify team 24hrs in advance; catch up via notes within 24hrs
Opposing opinions / disagreements	5	2	Structured discussion; majority vote if consensus fails; log decision
Unbalanced task allocation	3	3	Weekly workload check-ins; adjust duties if needed
Integration / technical issues	4	3	Regular testing; GitHub branches; merge early and often
Loss / corruption of project files	1	5	GitHub as primary backup; OneDrive as secondary

5. Signatures

By signing below, each team member agrees to the terms outlined in this charter and commits to fulfilling their assigned duties and responsibilities.

Full Name	Signature	Date
Aman Kushwaha		24th August 2026
James Olbes		24th August 2026
Anujitha Fernando		24th August 2026
Kenan Chu		24th August 2026
